

NC State University

Agricultural and Resource Economics - <http://www.ag-econ.ncsu.edu/>

The Department of Agricultural and Resource Economics addresses important issues regarding the management of agricultural and related businesses, the functioning of agricultural markets, the protection and use of resources, the performance of government policies affecting agricultural and related industries, and the impacts of decisions made by consumers with respect to the purchase of food and fiber products.

Value-Added and Alternative Agriculture Program - www.ncvalueadded.org

The Program for Value-Added and Alternative Agriculture brings together multidisciplinary teams to address the needs, challenges and opportunities of North Carolina farmers. We develop and deliver educational programs and information resources that help farmers be successful. Our programs are designed to enhance and integrate farmers' entrepreneurial, business, production, marketing and risk management skills. We work closely with [North Carolina Cooperative Extension](#) field faculty who work directly with farmers across the state.

Blake Brown, Director of the Value-Added Program Team

(704) 250-5404

blake_brown@ncsu.edu
